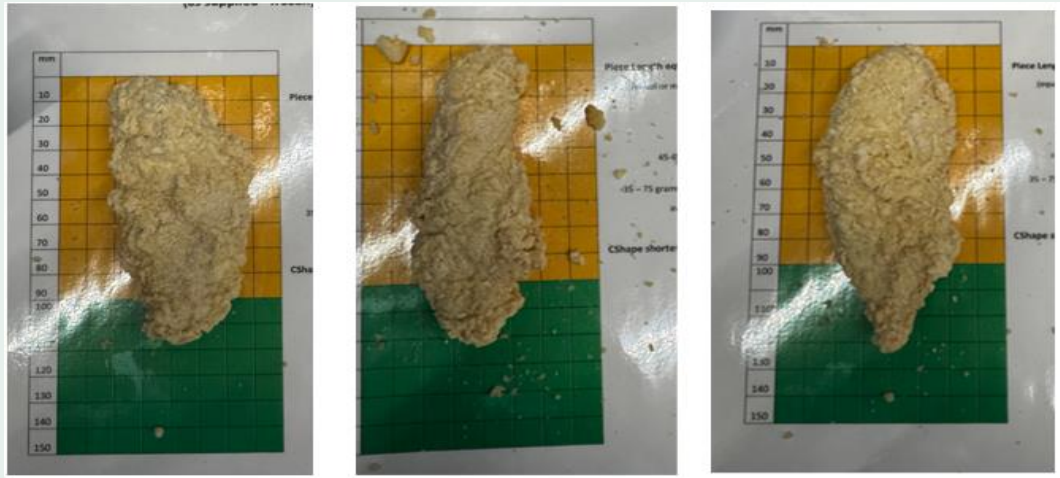
EMPLOYEE OF THE MONTH:

PROTEINS SIZES

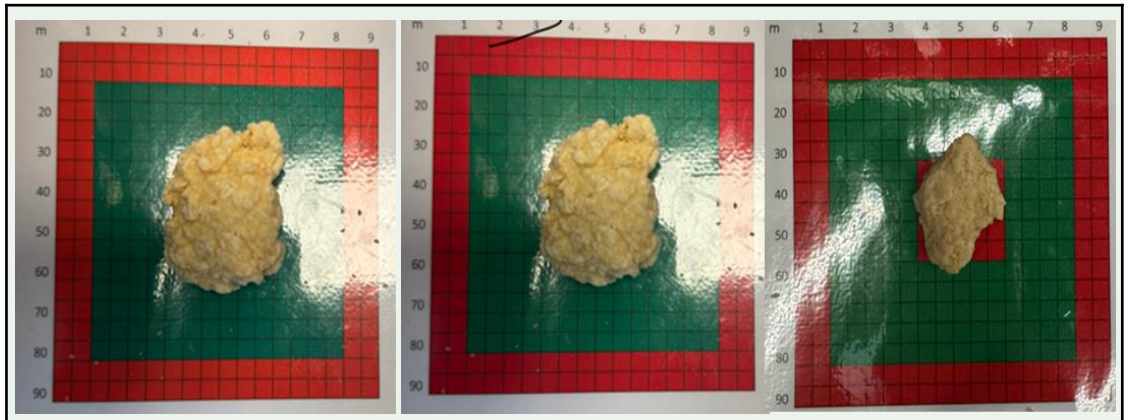
Tenders



- The piece should be longer than 90mm (unless c shape)
- If the length does not meet the green, it is technically out of specification
- The supplier has a tolerance of how many are allowed to be less than 90mm (10%).
- Example if I check 1 bag and find 3 (depending on piece count), this is technically still acceptable
- It's preferably to allow for tolerances as it's a natural product where shape variation occurs.

C Shape shorter than 90mm is acceptable

Boneless



- The boneless piece should be placed in the middle, with the red color visible.
- needs to be done in conjunction with referencing acceptable weights though
- If something looked particularly small (or big) they could check on the grid where it sat.

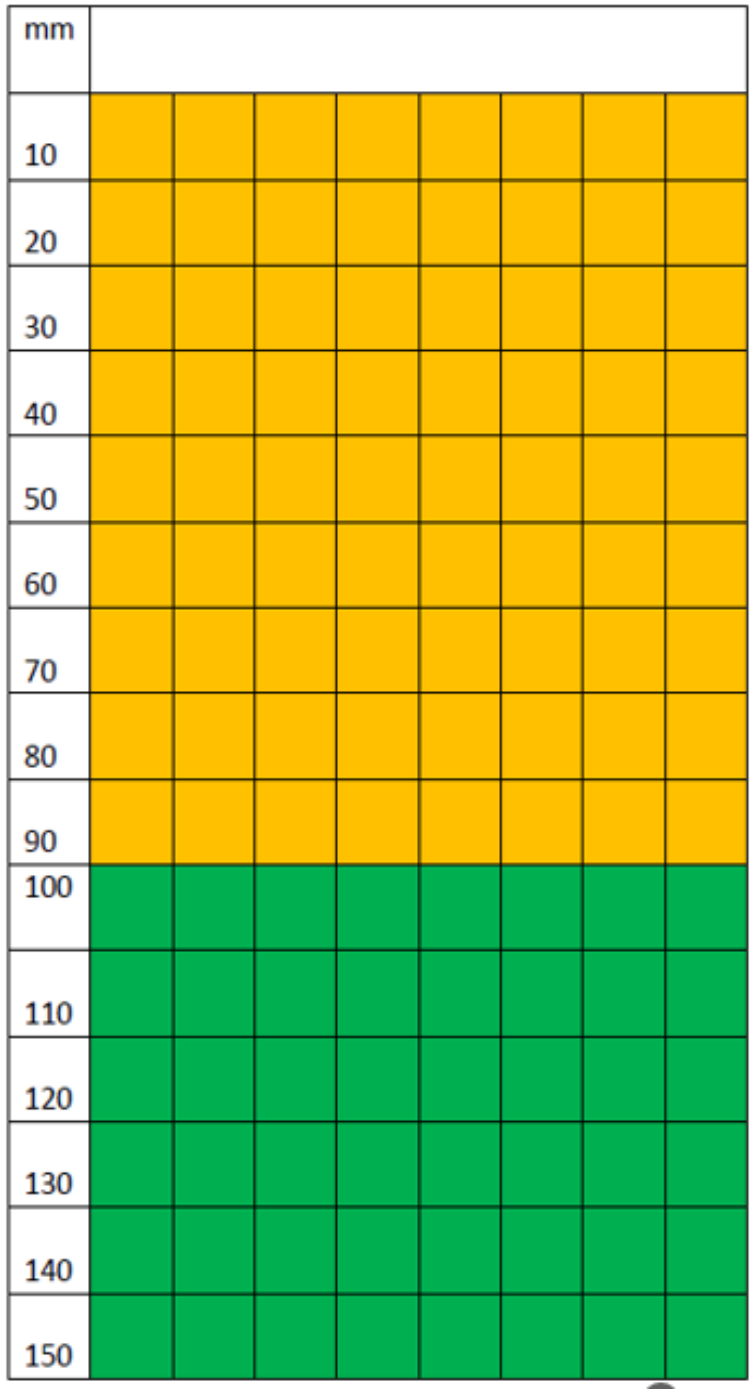
Green (acceptable)

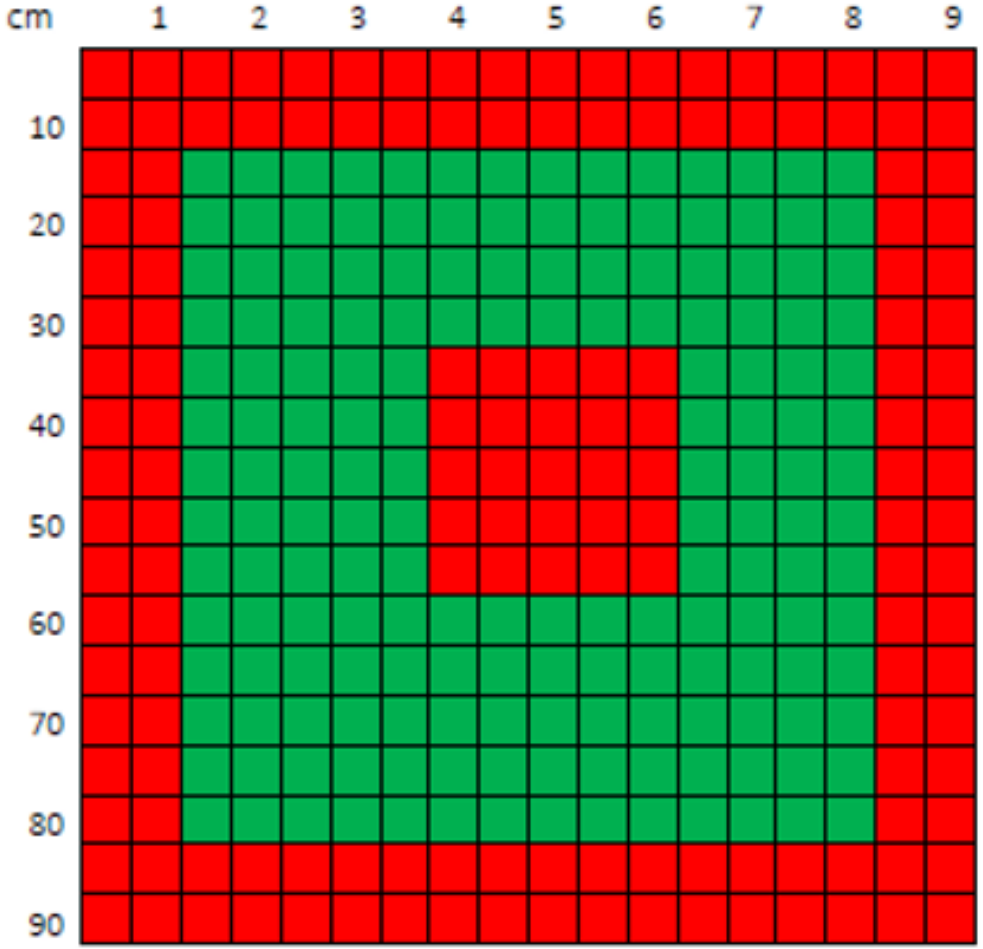
Equal or greater than 2.5cm x 2.5cm- fully covers the inner red square

equal or smaller than 7cm x 7cm

Red (not acceptable)

Equal **or smaller than 2.5cm x2.5cm**

Equal or greater than 7cm x 7cm




PROTEINS SIZE
